

ENVIRONMENTAL MANAGEMENT POLICY

The Board and Management of CISC Pty Ltd, operating as The Construction Training Centre (CTC), is a resource hub for the building and construction industry and is dedicated to building skill solutions.

In cooperation with our training partners and tenants, CTC is committed to protecting the environment, by pursuing the goal of minimising impact to land, water, air, flora and fauna and enhancing environmental sustainability.

CTC will achieve this by:

- Meeting or exceeding legislative, contract and other requirements relating to environmental management;
- Setting and reviewing environmental objectives and targets through the Management Review process with the aim of preventing pollution and reducing its negative environmental and carbon footprint;
- Collecting positive performance indicators and incident data, and utilising this information to drive continual improvement processes;
- Striving to demonstrate the lowest environmental impact in the Building and Construction Industry, including premises, plant, equipment, vehicles, substances, heritage listed items, waste management, land and water contamination;
- Ensuring that Environmental Impact Assessments are conducted where necessary when purchasing or using premises, plant, equipment, vehicles, substances and systems of work;
- Making managers and supervisors responsible and accountable for the environmental performance of their operations, including responsibility for the efficient use and recycling/reuse of resources and materials;
- Inducting, educating and training employees, contractors and tenants on their environmental obligations to protect the environment for the benefit of the wider community;
- Documenting and regularly reviewing processes and procedures for environmental management;
- Reporting and investigating all environmental incidents, and ensuring that corrective actions are implemented to prevent recurrence;
- Adopting risk based thinking and a process approach to our operations to help achieve our environmental goals; and
- Maintaining, monitoring, reviewing, auditing and continually improving the Environmental Management System consistent with certification requirements of ISO 14001.
